EGYHIA

Research Group Kick-off Meeting

From shared expertise to collaborative research in Health Informatics

Dr. Iman Badr | Research Group Leader

Egyptian Association for Health Informatics – EGYHIA

TODAY

Meeting Agenda

A focused first conversation to understand the team, shape our direction, and agree on next steps.

01

Introducing Ourselves

Backgrounds, expertise, interests

02

Defining Our Mission & Vision

What should the Research Group become?

03

Identifying Research Priorities

Where do real healthcare needs meet technology?

04

Next Steps

Initial actions, owners, deadlines, next meeting

Today's goal

Listen
Explore
Connect
Prioritize
Act

Dr. Ing. Iman Badr

Research Group Leader | Data Scientist | Artificial Intelligence Specialist

25+

years across
computer science, AI, research,
and software development

PhD · University of Stuttgart

Postdoctoral Research · TUM

20+ years university teaching

Research & Teaching

AI, Data Science, Machine Learning, neural networks, intelligent systems, student supervision and research projects.

Industry Experience

Data Scientist & Software Developer in Germany, including automotive projects connected to Audi and real-world AI applications.

Research Profile

Peer-reviewed international publications and experience reviewing and evaluating research papers in Artificial Intelligence.

What I Bring to EGYHIA

A bridge between research, technology and practical problem-solving — with a focus on turning ideas into collaborative research projects.

Let’s Get to Know One Another

Please keep your introduction brief and focus on what you can bring to the group.

01

Who are you?

Name, role, academic/professional background

02

What is your expertise?

Your field, experience, and current interests

03

What challenges do you see?

A real problem in your field that needs a better solution

04

Where could technology help?

An idea for AI, Data Science, software or digital health

What Should Our Research Group Become?

We will shape the answer together — this slide is a starting framework, not a finished statement.

MISSION

To address pressing healthcare challenges in Egypt and the wider Arab world through interdisciplinary collaboration and rigorous, ethical, and innovative research. We are committed to producing high-quality scientific evidence, publishing our findings in reputable, high-impact peer-reviewed journals, and translating research outcomes into practical solutions that inform healthcare decisions and improve patient outcomes and population health.

VISION

To become a leading research group in healthcare innovation, recognized for scientific excellence, high-impact publications, and the translation of innovative research into evidence-based solutions that improve healthcare and health outcomes nationally and internationally

Discussion question **What would success look like for EGYHIA's Research Group after 1 year — and after 3 years?**

Thank You

Let’s build a research community that connects expertise, ideas, technology and impact.

Dr. Iman Badr

Research Group Leader | EGYHIA

From ideas → research questions → collaborative projects → impact
